

Virginia Locality-to-Locality Commuting Data

March 2018

Demographics Research Group
Weldon Cooper Center for Public Service
University of Virginia

About the Report

This document presents, for each county and city in Virginia, the top 10 localities where residents commuted to or workers commuted from. The data come from the Census Bureau's latest 2015 Longitudinal Employer-Household Dynamics program (LEHD), specifically the LEHD Origin-Destination Employment Statistics (LODES) dataset¹.

As with all data, this data has its limitations. It includes primarily jobs covered by state unemployment insurance programs, as well as some federal civilian jobs. Self-employed, informally employed, military, and many Federal employees (such as those working at intelligence or national security agencies) are excluded from the data. In addition, there are cases in which the place of employment is counted administratively (such as the HR office) and may be different from the physical location where an employee reports for work, resulting in some inaccuracies in commuting.

With these caveats in mind, enjoy the rich information LODES data provides, and feel free to contact us at demographics@virginia.edu with questions.

¹U.S. Census Bureau. (2018). LEHD Origin-Destination Employment Statistics Data (2002-2015). Washington, DC: U.S. Census Bureau, Longitudinal-Employer Household Dynamics Program, accessed on March 15, 2018 at <https://lehd.ces.census.gov/data/#lodes>. LODES 7.3
